STELVIN®

TricorBraun WinePak and Amcor have a partnership that is over a decade strong, **bringing you bottles and STELVIN® closures together from one source**, so you can get back to handling the wine, while we handle the packaging.

STOCK CLOSURES

Amcor offers **14 stock colors for STELVIN®**, from classic to trendy—many available to ship directly from TricorBraun WinePak.

CUSTOM ENGRAVING

Laser technology used to engrave aluminum STELVIN® closures with high quality, precision artwork is transforming brands and attracting consumer attention. Now, wineries can customize their closures with laser-engraving. This decoration option is very attractive for customers of all sizes because there is no tooling set-up cost, lead times and minimum orders are lower. The engraving delivers extremely detailed artwork on the closure top and is available on standard and custom-decorated STELVIN® closures.

SHAPEART TEXTURE

Iconic closures for distinctive brands. Stand out from the crowd by adding texture to your STELVIN® closures, a unique technology offered by Amcor. Standard and custom options available. Click here to watch a video on Amcor's new technology available to the wine industry.

CUSTOM PRINTING

- Premium silk-screen printing or high-speed offset printing (up to 5 colors on skirt / 3 colors on head)
- Printed embossing on head
- A large selection of liners adapted to winemakers' needs
